• Add lion and hyena

Need to lower the music when
the names are activated

Lion

Vulnerable
VU

Females lions,
called lioness,
do the hunting.

Carnivore

Family: Felidae
Genus: Panthera
Species: leo

Males 3.9 feet, Female 3.6 feet, at shoulders.

- Get David to record Genus **Panthera** and **Lion / Lioness**
- Need lion sound – check to see of **Maya** did this

Need to lower the music when
the names are activated

Spotted Hyena

Least Concern
LC

These Laughing Hyenas
are predators, not
scavengers.

Carnivore

Family: Hyaenidae
Genus: Crocuta
Species: *C. crocuta*

Adult male spotted hyenas in the Serengeti weigh 40.5–55.0 kg (89–121 lb), while females weigh 44.5–63.9 kg (98–141 lb).
2.3-3 feet tall, at shoulders.

- Get David to record Genus *Crocuta* and Spotted Hyena

Need to lower the music when
the names are activated

Addax

Critically Endangered

(CR)

These desert antelope have
flat hooves and soles to
prevent sinking in sand.

Herbivore

Family: Bovidae

Genus: Addax

Species: *A. nasomaculatus*

Size: Head and body length: 150 to 170 cm (59.1 to 66.9 in.)
Weight Male: 99 to 123.75 kg (220 to 275 lbs.)
Female: 60 to 125 kg (132 to 275 lbs.)

They are sexually dimorphic, as the females are smaller
than males.

Need to lower the music when
the names are activated

Ader's Duiker

Vulnerable
(vU)

These little slinkers follow
tree monkeys around, eating
what they drop.

Omnivore

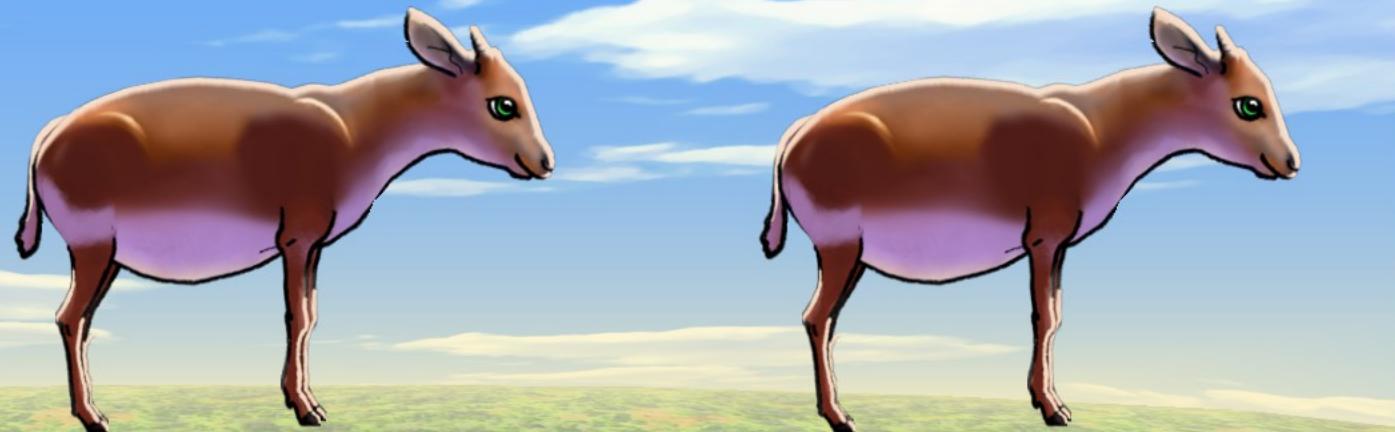

Add pic Insect (ant),
frog/lizard, birds

Family: Bovidea

Genus: Cephalophus

Species: C. adersi

Need to lower the music when
the names are activated

Size 85 to 100 cm (34 to 40 in.)

Weight Male: 65 to 80 kg (143 to 176 lbs.)

Female: 55 to 70 kg (121 to 154 lbs.)

Blesbok

Least Concern

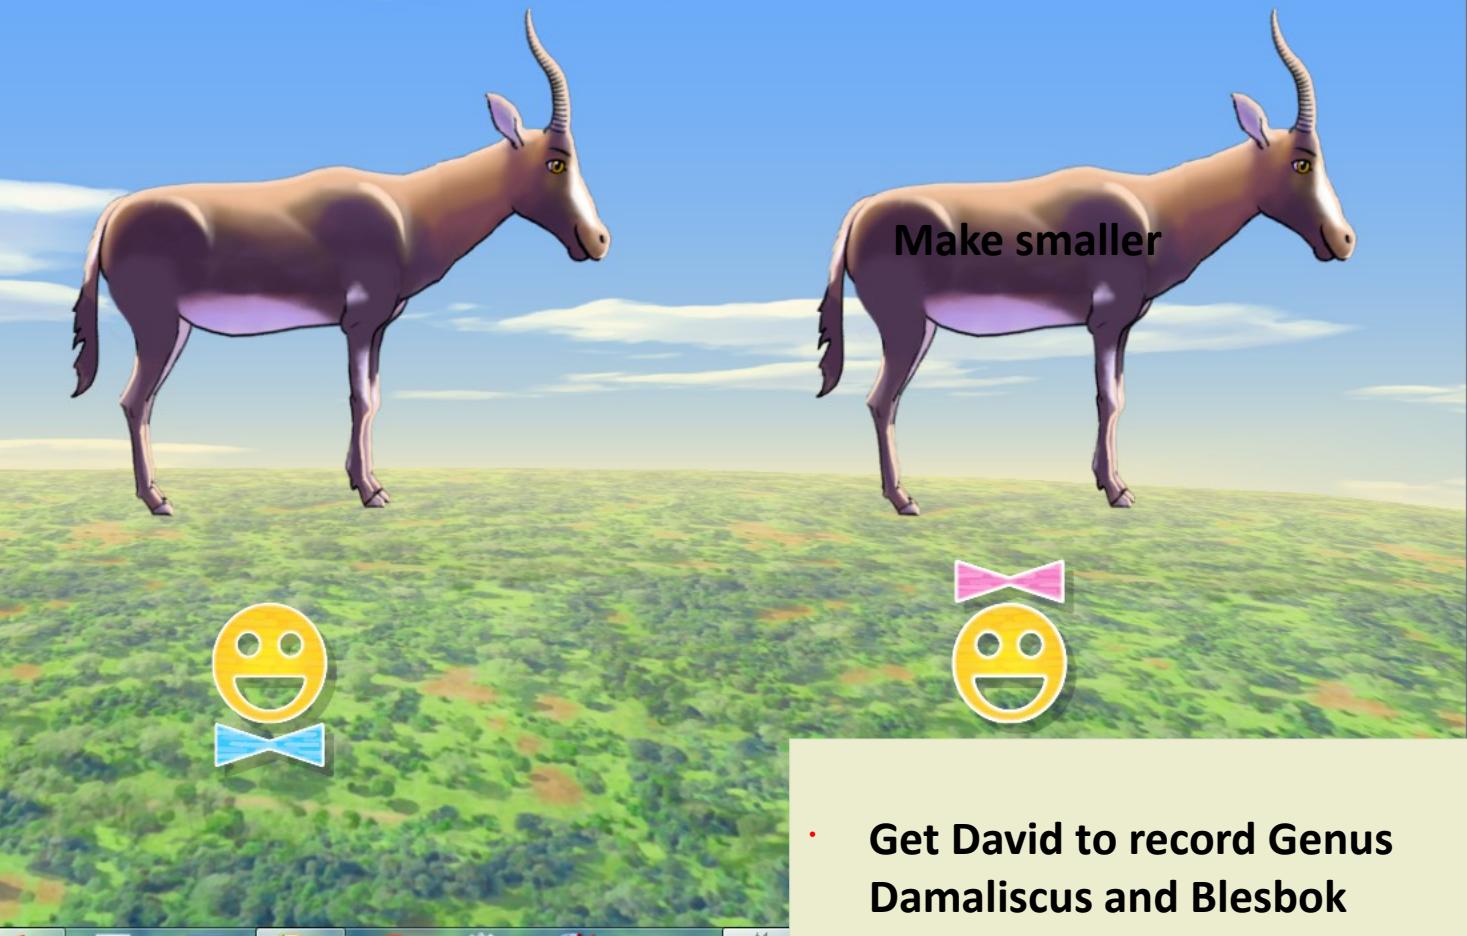

(LC)

The common name derives
from Afrikaans words for
blazed antelope

Herbivore

Family: Bovidae
Genus: Damaliscus
Species: D. pygargus

- Get David to record Genus Damaliscus and Blesbok

Need to lower the music when
the names are activated

Blue Wildebeest

Least Concern

(LC)

These migrating
wildebeest make a sound
like Gnu Gnu

Herbivore

Family: Bovidae
Genus: Connochaetes
Species: C. taurinus

Description

This subspecies of wildebeest has a white beard, unlike most other subspecies which have black beards; both sexes have smooth, cowlike horns.

Size

Male: 1.25 to 1.45 m (50 to 58 in.) at the shoulder

Female: 1.15 to 1.42 m (46 to 57 in.) at the shoulder

Weight

Male: 165 to 274 kg (360 to 600 lbs.)

Female: 140 to 230 kg (308 to 510 lbs.)

- Get David to record Genus
Connochaetes and Blue Wildebeest

Need to lower the music when
the names are activated

Blue Wildebeest

Least Concern

(LC)

These migrating
wildebeest make a sound
like Gnu Gnu

Herbivore

Family: Bovidae
Genus: Connochaetes
Species: C. taurinus

Description

This subspecies of wildebeest has a white beard, unlike most other subspecies which have black beards; both sexes have smooth, cowlike horns.

Size

Male: 1.25 to 1.45 m (50 to 58 in.) at the shoulder

Female: 1.15 to 1.42 m (46 to 57 in.) at the shoulder

Weight

Male: 165 to 274 kg (360 to 600 lbs.)

- Get David to record Genus
Connochaetes and Blue Wildebeest

Need to lower the music when
the names are activated

Bohor Reedbuck

Least Concern

(LC)

These antelope mark
their boundary
with a shrill whistle

Herbivore

Family: Bovidae

Genus: Redunca

Species: R. redunca

Males reach approximately 75–89 cm (30–35 in) at the shoulder, while females reach 69–76 cm (27–30 in). Males typically weigh 43–65 kg (95–143 lb) and females 35–45 kg (77–99 lb). Only the males possess horns which measure about 25–35 cm (9.8–13.8 in) long.

Need to lower the music when
the names are activated

Bongo

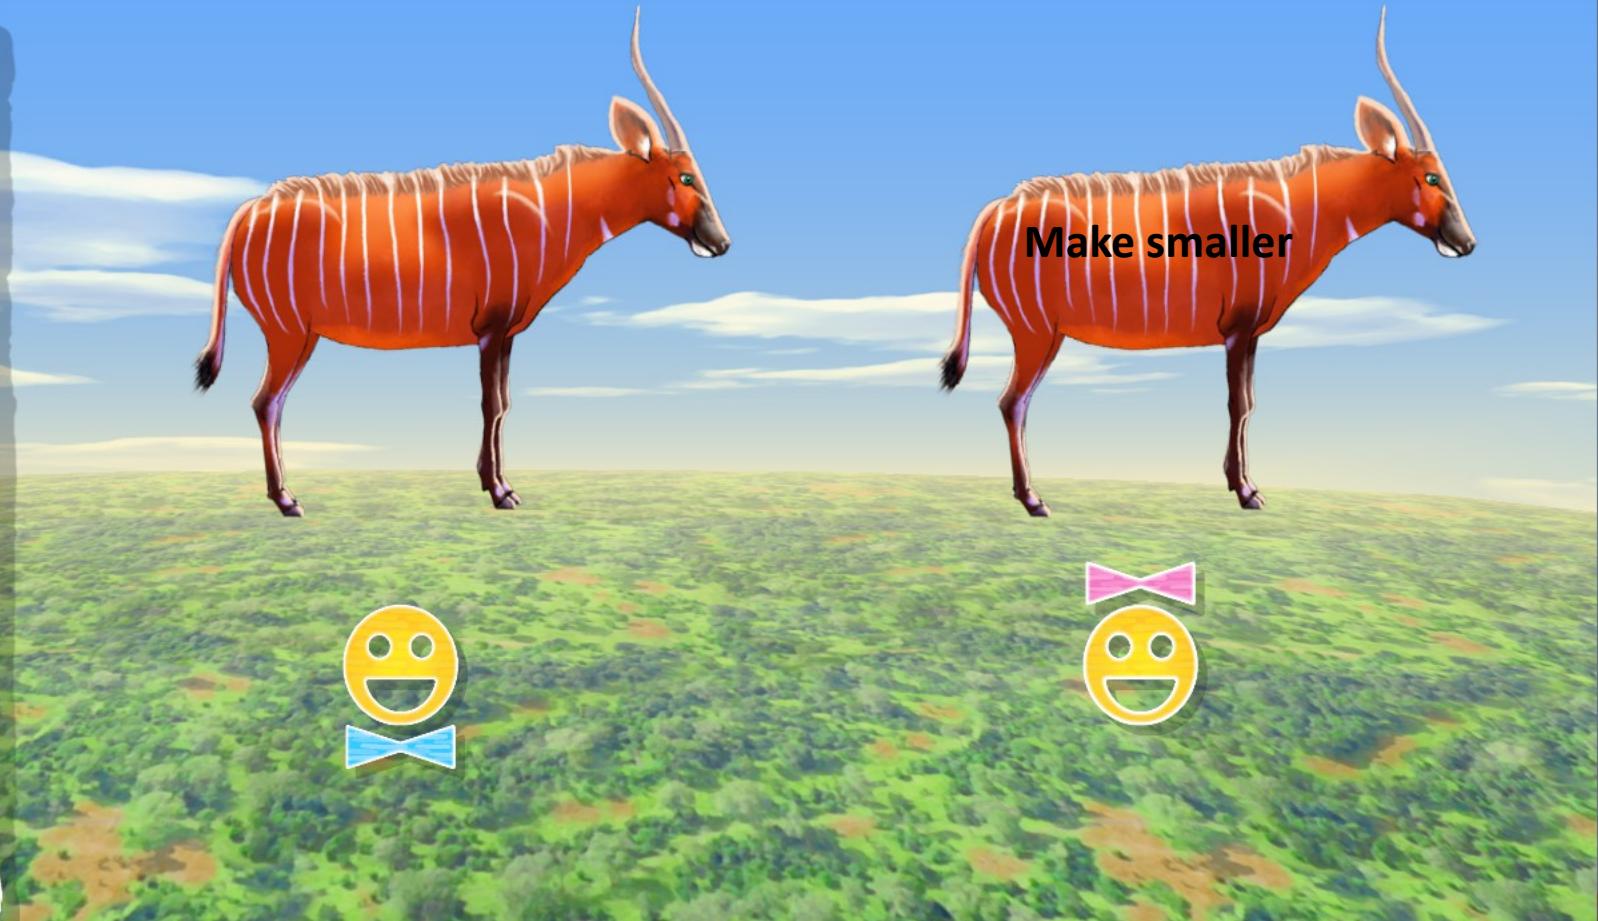

Near Threatened
(NT)

Bongo wallow in mud
to lower body
temperature. They use
mud to cool down.

Herbivore

Family: Bovidae
Genus: Tragelaphus
Species: T. eurycerus

Size 110 to 130 cm (44 to 54 in.)
Male: Males slightly larger than females
Weight
Male: 240 to 405 kg (528 to 891 lbs.)
Female: 210 to 253 kg (462 to 557 lbs.)

Need to lower the music when
the names are activated

Cuvier's Gazelle

Vulnerable

(vu)

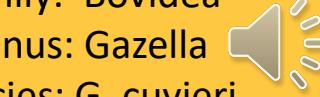

Cuvier's gazelles are
found in the Atlas
Mountain in North Africa

Family: Bovidae

Genus: Gazella

Species: G. cuvieri

The Cuvier's gazelle is one of the darkest and smallest of the gazelle species, standing 60–69 cm (1.97–2.26 ft) tall, with an average weight of 35 kg (77 lb). It is characterized by a distinctive wide, dark band that runs along the sides of the animal, which separates the brown dorsal parts from the white ventral parts. While both sexes have horns between 10 and 15 cm (3.9 and 5.9 in) long, the males' are more ribbed and have greater mass. Also they possess long, slender ears.[3]

Both sexes usually have medium-length ringed horns curved like an "S". Males' horns are about 35 cm (14 in) long, while females' horns are much shorter.

Dama Gazelle

Critically Endangered

(CR)

The largest gazelle is known hopping up and down, called pronking, to warn of danger.

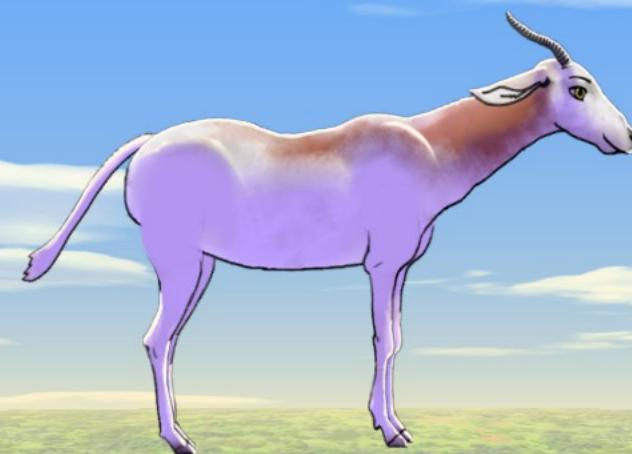

Family: Bovidae

Genus: Nanger

Species: N. dama

Need to lower the music when
the names are activated

Dorcas Gazelle

Vulnerable

(vU)

The smallest gazelle can
go their entire lives
without drinking

Herbivore

Family: Bovidea

Genus: Gazella

Species: G. dorca

Need to lower the music when
the names are activated

Giant Eland

Least Concern

(vU)

The largest of antelope
like to eat fruit,
such as plums.

Herbivore

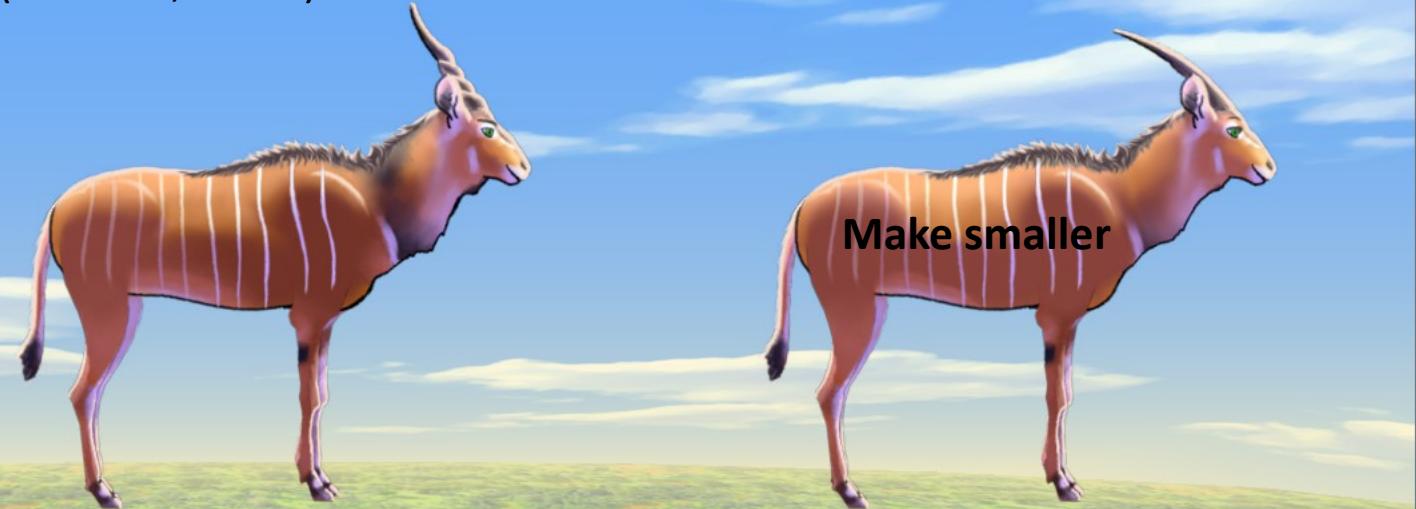

Family: Bovidae

Genus: Taurotragus

Species: T. derbianus

Giant elands exhibit sexual dimorphism, as males are larger than females. The males weigh 400 to 1,000 kg (880 to 2,200 lb) and females weigh 300 to 600 kg (660 to 1,320 lb)

Need to lower the music when
the names are activated

Bulls weigh 190–270 kg (420–600 lb), with a maximum of 315 kg (694 lb), and stand up to 160 cm (63 in) tall at the shoulder. The ears of the greater kudu are large and round.

Cows weigh 120–210 kg (260–460 lb) and stand as little as 100 cm (39 in) tall at the shoulder; they are hornless, without a beard or nose markings. The head-and-body length is 185–245 cm (6.07–8.04 ft), to which the tail may add a further 30–55 cm (12–22 in)

Greater Kudu

Least Concern

(LC)

FACT:

Greater Kudu horns are
made into musical
instruments

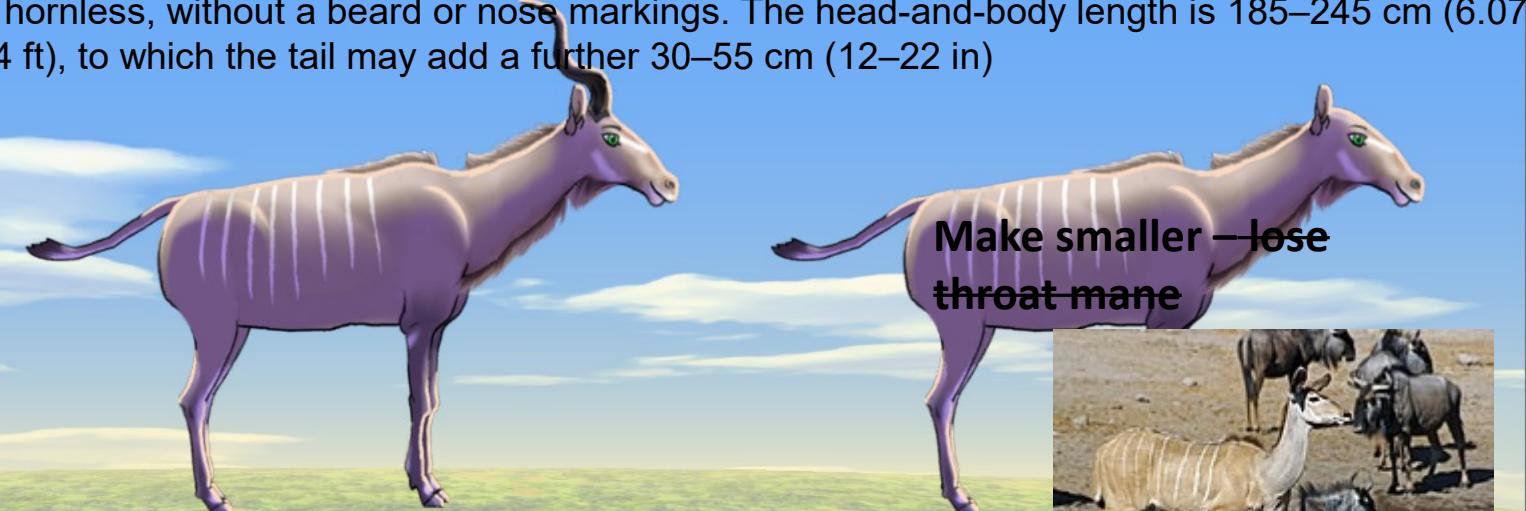

Herbivore

Family: Bovidae

Genus: Tragelaphus

Species: T. strepsiceros

Need to lower the music when
the names are activated

Hunter's Antelope

Critically Endangered

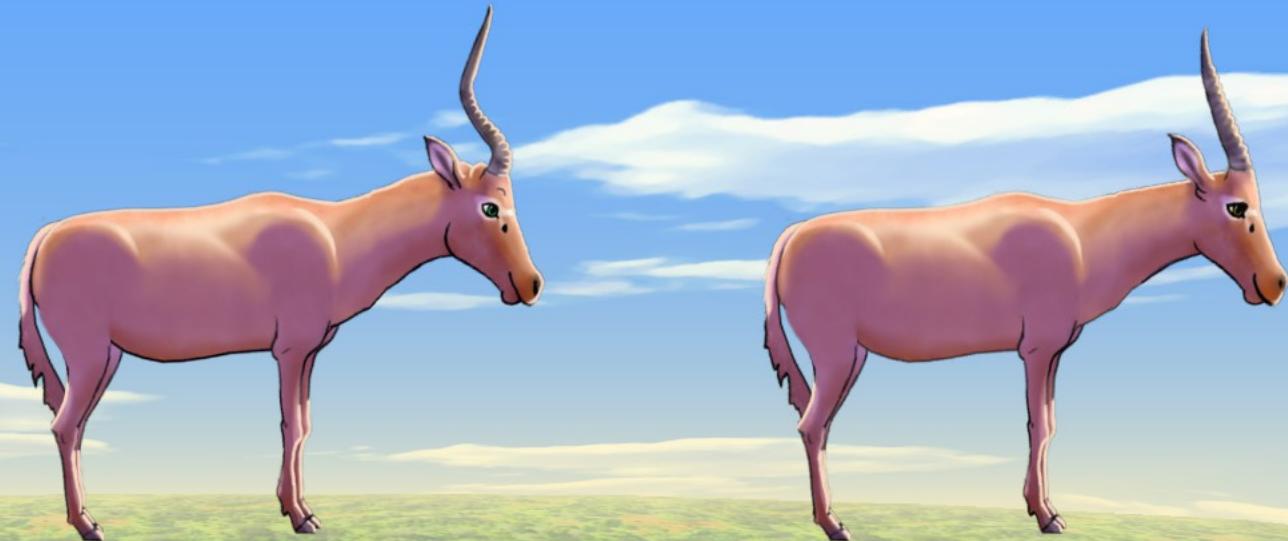

(CR)

Less than 500 left in the
wild and 0 in captivity,
extinction looms.

Herbivore

Family: Bovidae
Genus: Beatragus
Species: B. hunteri

- Get David to record Genus Beatragus and Hunter's Antelope

Need to lower the music when
the names are activated

Impala

Least Concern

(LC)

These amazing jumper
can span 40 feet and
reach 10 feet high.

Herbivore

Family: Bovidae

Genus: Aepyceros

Species: *A. melampus*

Male: Only the males have horns

Male: 58 to 70 cm (23 to 28 in.)

Female: 58 tp 64 cm (23 to 25 in.)
Weight Male: 45.5 to 79.5 kg
(100 to 175 lbs.)

Female: Smaller and lighter than males

Weighing 11-13 Kg and standing 500-600mm high at the shoulders, this is a small and stocky antelope. Ewes are slightly larger than the rams.

Klipspringer

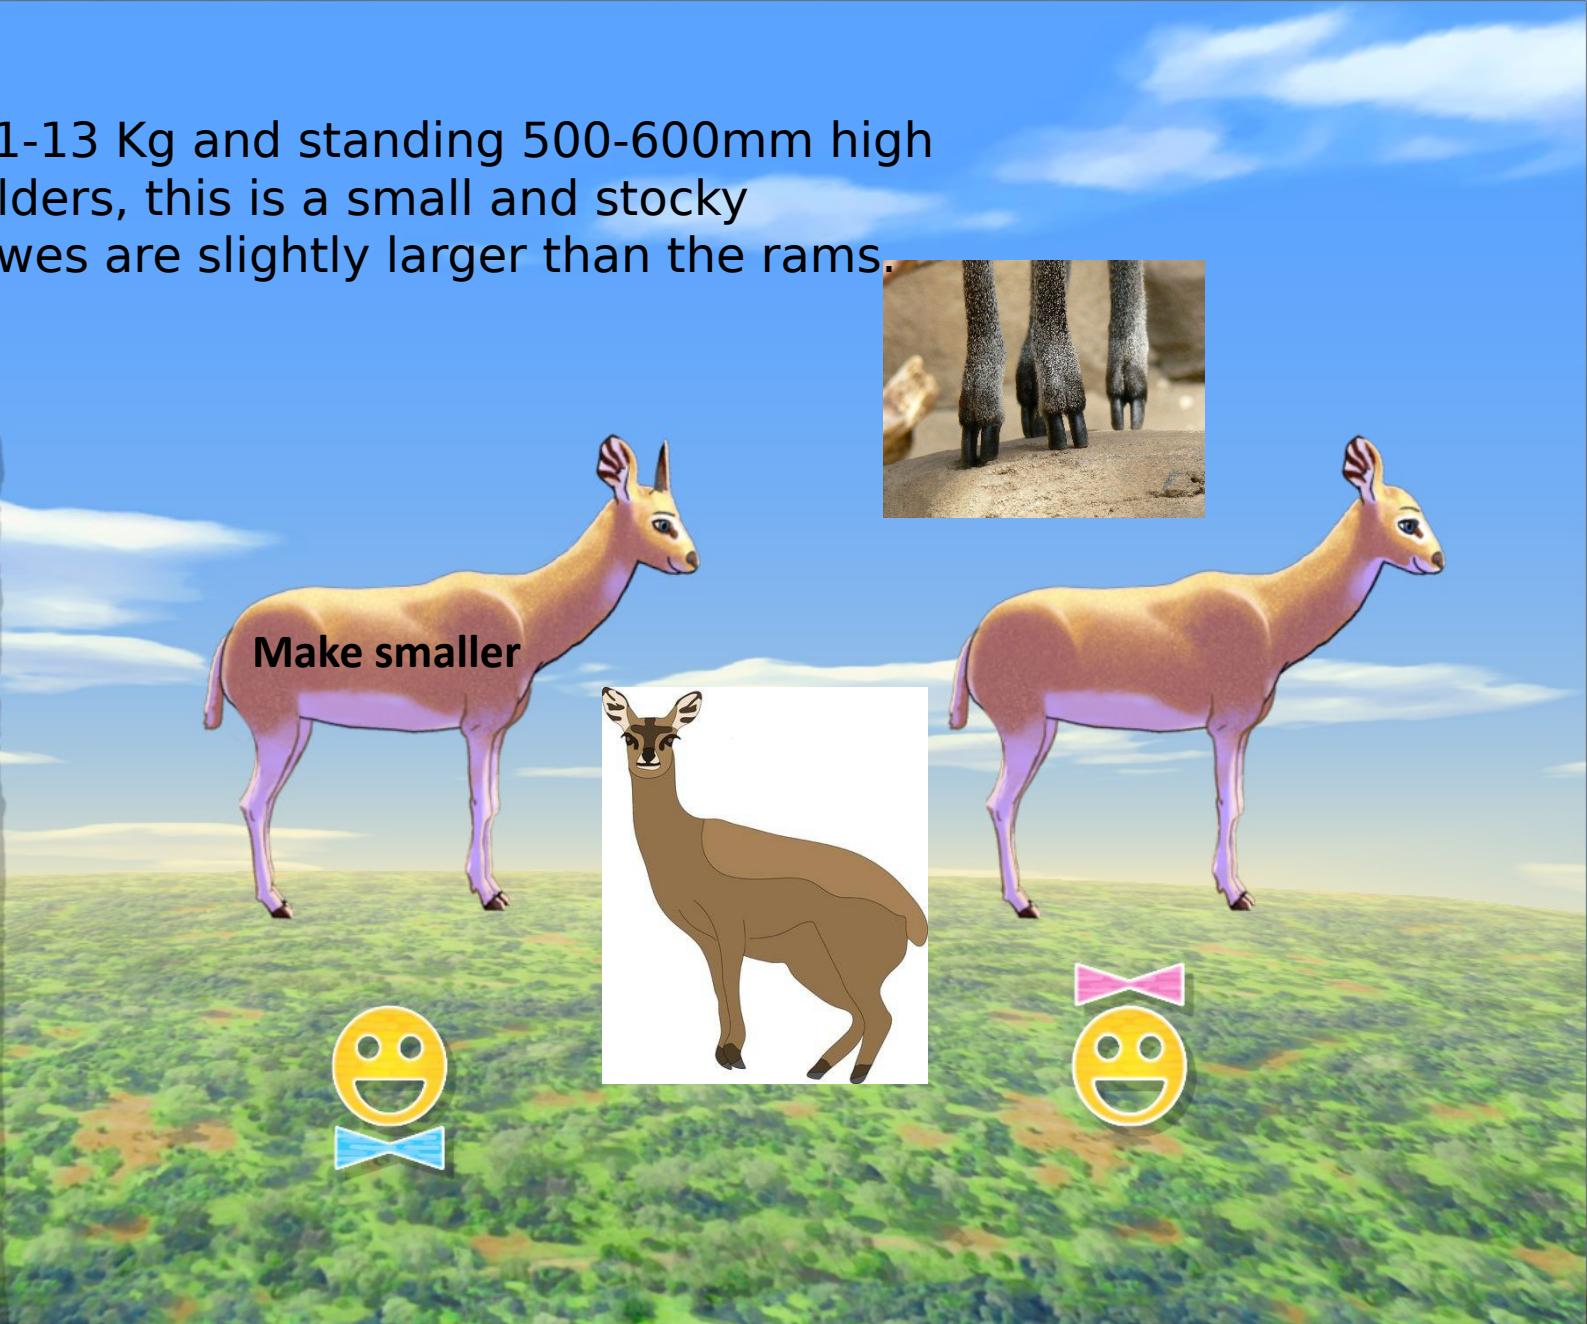

Least Concern

(CR)

These rock jumpers walk on the tips of their hooves.

Herbivore

Family: Bovidae
Genus: Oreamnos
Species: O. oreotragus

Need to lower the music when the names are activated

The mountain nyala is a large sexually dimorphic bovid. The head-and-body length is approximately 240–260 cm (94–102 in) in males and 190–200 cm (75–79 in) in females. The males are typically 120–135 cm (47–53 in) tall while females stand 90–100 cm (35–39 in) at the shoulder. Males weigh 180–300 kg (400–660 lb) and females weigh 150–200 kg (330–440 lb). The bushy tail reaches the heel, and is 20–25 cm (7.9–9.8 in) long.[12] The sensitive ears are large and lined with white hair.[5]

Mountain Nyala

Endangered

(EN)

Found only in the
Ethiopian highlands, east
of the Rift Valley.

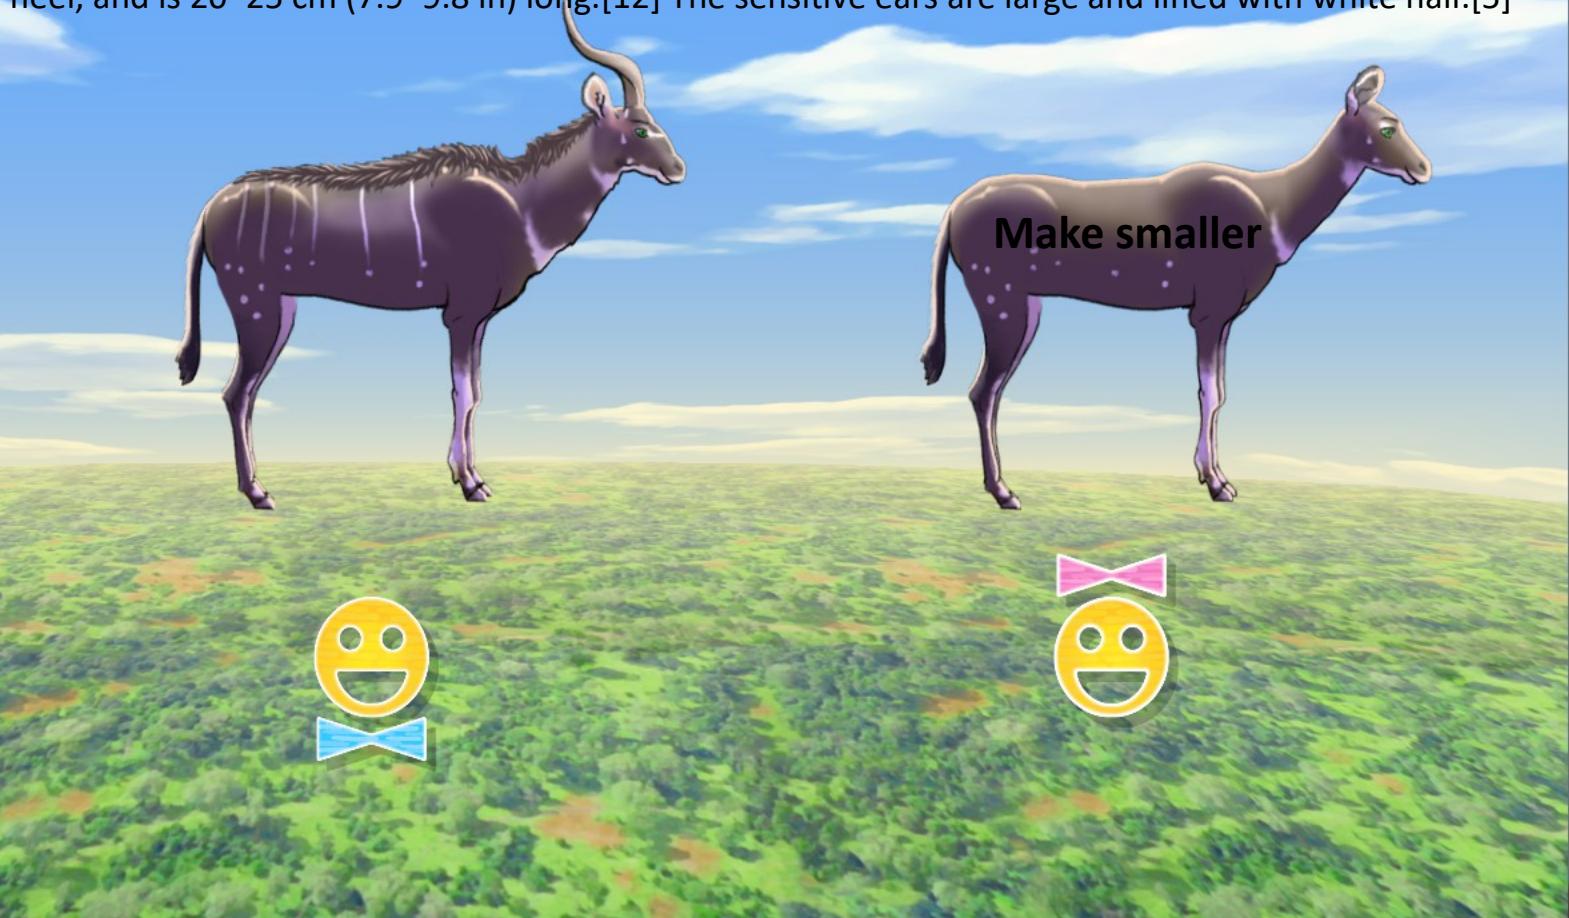

Herbivore

Family: Bovidae

Genus: Tragelaphus

Species: T. buxtoni

Need to lower the music when
the names are activated

Nile Lechwe

Endangered

(EN)

Born the same color, it is the male that changes his markings as he matures.

Herbivore

Family: Bovidae
Genus: Kobus
Species: K. megaceros

Length: Females, 4.2 to 5.6 feet; males, 5.2 to 5.9 feet
Height: Females, 2.6 to 2.8 feet; males, 3.2 to 3.4 feet tall at the shoulder
Weight: Females, 132 to 198 pounds; males, 198 to 265 pounds

Need to lower the music when
the names are activated

Oribi

Least Concern

(LC)

This dwarf antelope
can be water independent if
water is scarce.

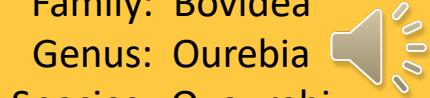

Herbivore

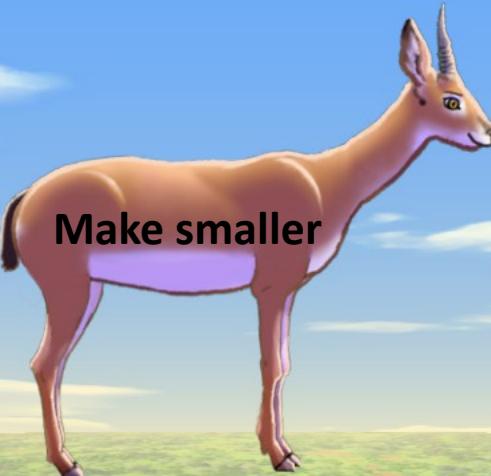

Family: Bovidae

Genus: Ourebia

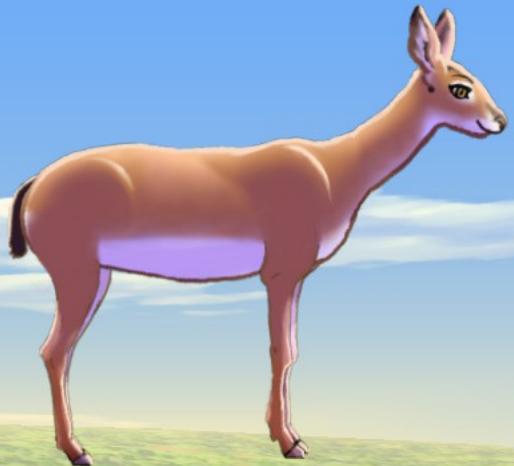

Species: *O. ourebi*

Adult rams measure 600 mm at the shoulders and weighs 14 kg. Ewes are slightly larger than rams.

Make smaller

Need to lower the music when
the names are activated

Puku

Near Threatened

(NT)

These grass eaters
repeat a shrill whistle
when in danger.

Herbivore

Family: Bovidea

Genus: Kobus

Species: K. vardoni

Need to lower the music when
the names are activated

Red-fronted Gazelle

Vulnerable

(VU)

These Sahel dwellers live
between the Saraha and the
savannah and migrate to
find water.

Family: Bovidea

Genus: Eudorcas

Species: *E. rufifrons*

Need to lower the music when
the names are activated

Red Hartebeest

Least Concern

(LC)

These antelope rely on their
sense of smell and good
hearing to make up for their
poor vision.

Herbivore

Family: Bovidae

Genus: Alcelaphus

Species: A. b. caama

- Get David to record Genus *Alcelaphus* and Red Hartebeest

Need to lower the music when
the names are activated

The sexes look much alike, standing 126-150 cm (50-59 inches), but males are heavier (280 kg [620 pounds] versus 260 kg [570 pounds] for females) and have thicker, sickle-shaped horns 55-99 cm (22-39 inches) long, 10-20 percent longer than those of females

Roan Antelope

Least Concern

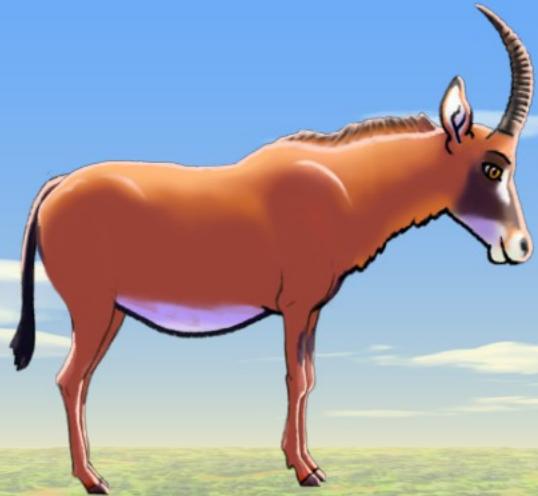

(LC)

The so-called horse
antelopes fight each other
on their “knees”.

Herbivore

Family: Bovidae
Genus: Hippotragus
Species: H. equinus

Need to lower the music when
the names are activated

The sable antelope is sexually dimorphic, with the male heavier and about one-fifth taller than the female.[9] The head-and-body length is typically between 190 and 255 cm (75 and 100 in).[10] Males reach about 117–140 cm (46–55 in) at the shoulder, while females are slightly shorter. Males typically weigh 235 kg (518 lb) and females 220 kg (490 lb).[11]

Sable Antelope

Least Concern

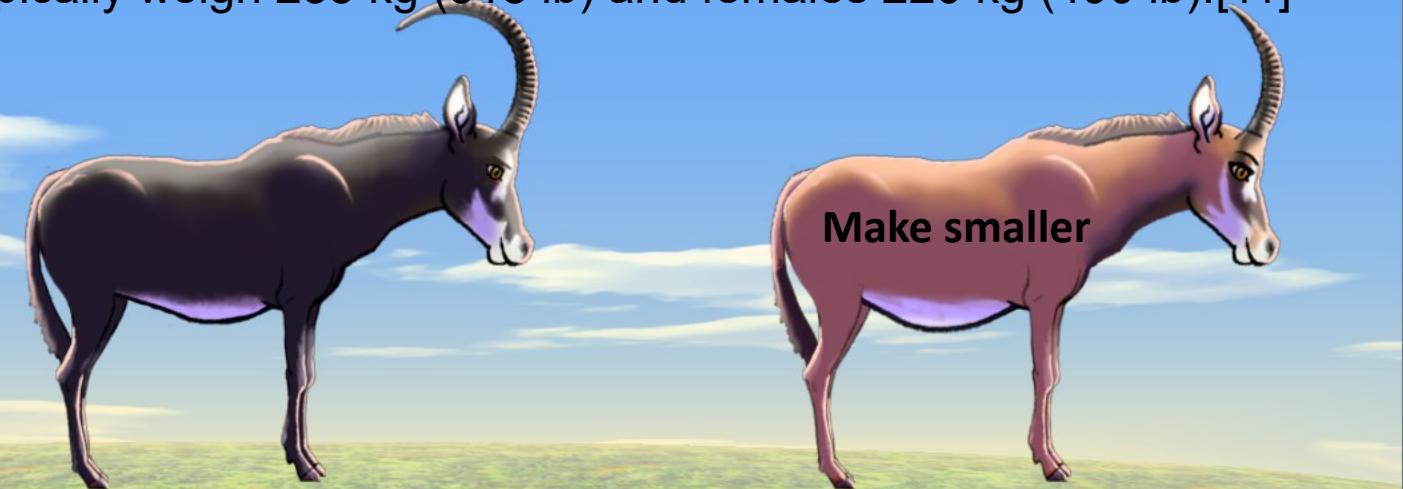

(LC)

These salt licking, bone
chewing antelope do it for
the minerals.

Herbivore

Family: Bovidae
Genus: Hippotragus
Species: H. niger

Need to lower the music when
the names are activated

Slender-horned Gazelle

Endangered

(EN)

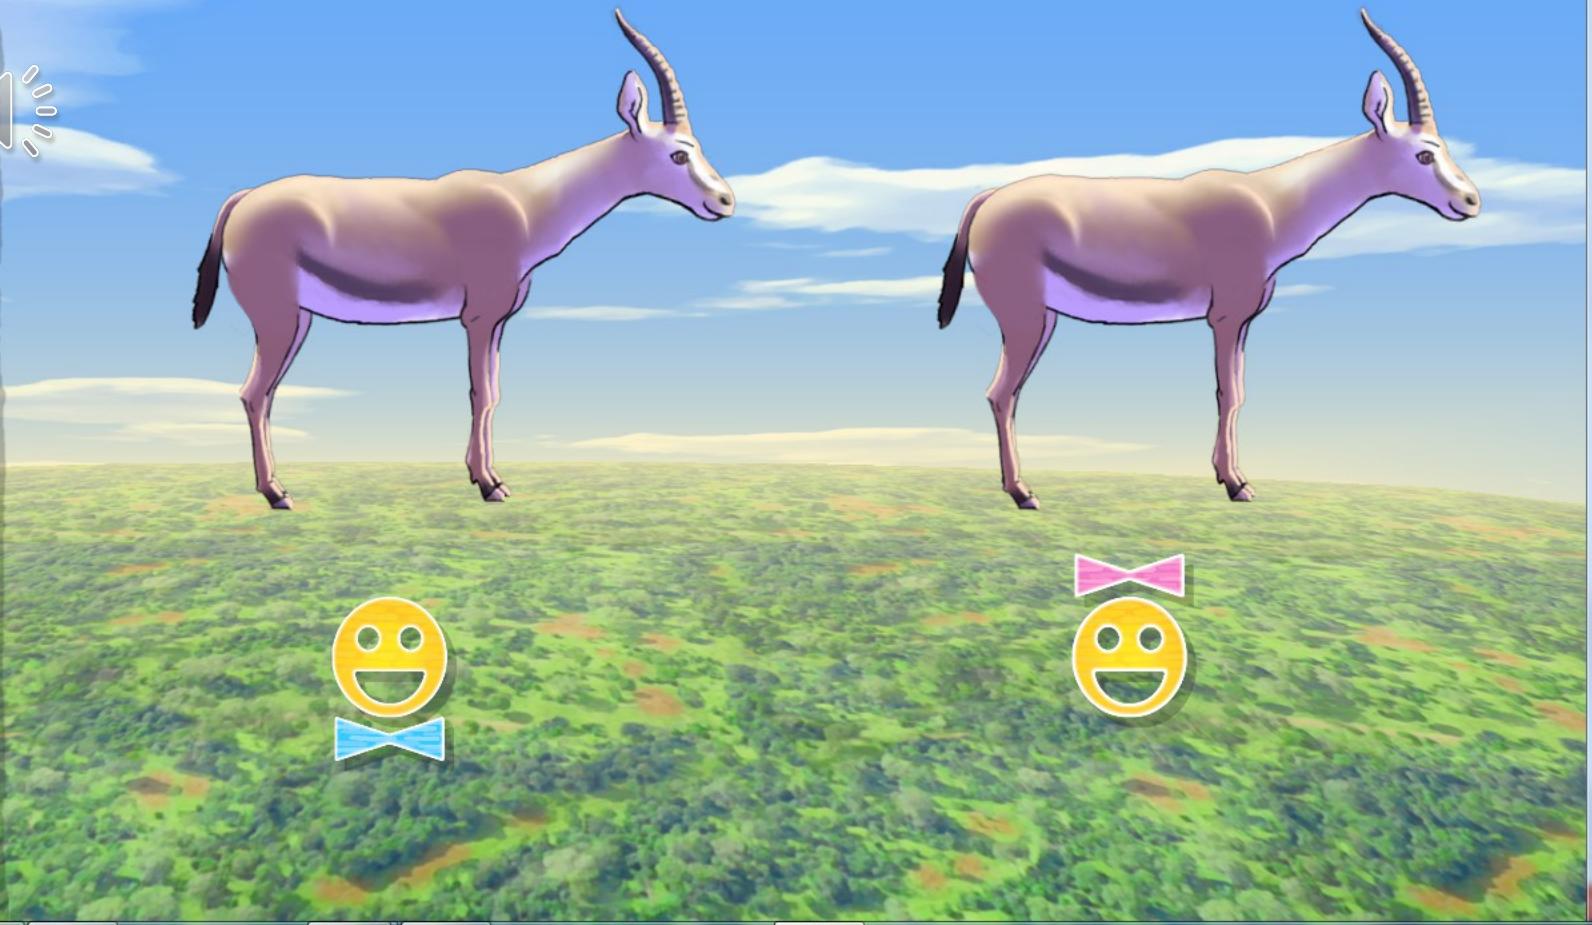

These desert loving species have flat hooves to walk on sand.

Herbivore

Family: Bovidea

Genus: *Gazella*

Species: *G. leptoceros*

Need to lower the music when
the names are activated

Suni

Least Concern

(LC)

These tiny antelope have a
BIG smell due to a gland
located on their heads.

Herbivore

Family: Bovidae

Genus: Neotragus

Species: N. moschatus

Male: Males have ridged horns.

Female: Females have short and more often broken or deformed horns.

Thomson's Gazelle

Least Concern

(LC)

Tommies swing their tails
from side to side, like a
windshield wiper.

Herbivore

Family: Bovidae

Genus: Eudorcas

Species: *E. thomsonii*

Can we get the tails
to swing sideways?

Need to lower the music when
the names are activated

Topi

Least Concern

(LC)

These mud rolling antelope
rub their heads on the
ground to spread their scent
from their facial glands.

Family: Bovidae

Genus: Damaliscus

Species: D. lunatus

They are a tall species, ranging in height from 100 to 130 cm (39 to 51 in) at the shoulder.[5][6] Males tend to be larger and darker than females.

Get David to record Topi

Need to lower the music when
the names are activated

males are generally about 25 percent larger than the females.

Waterbuck

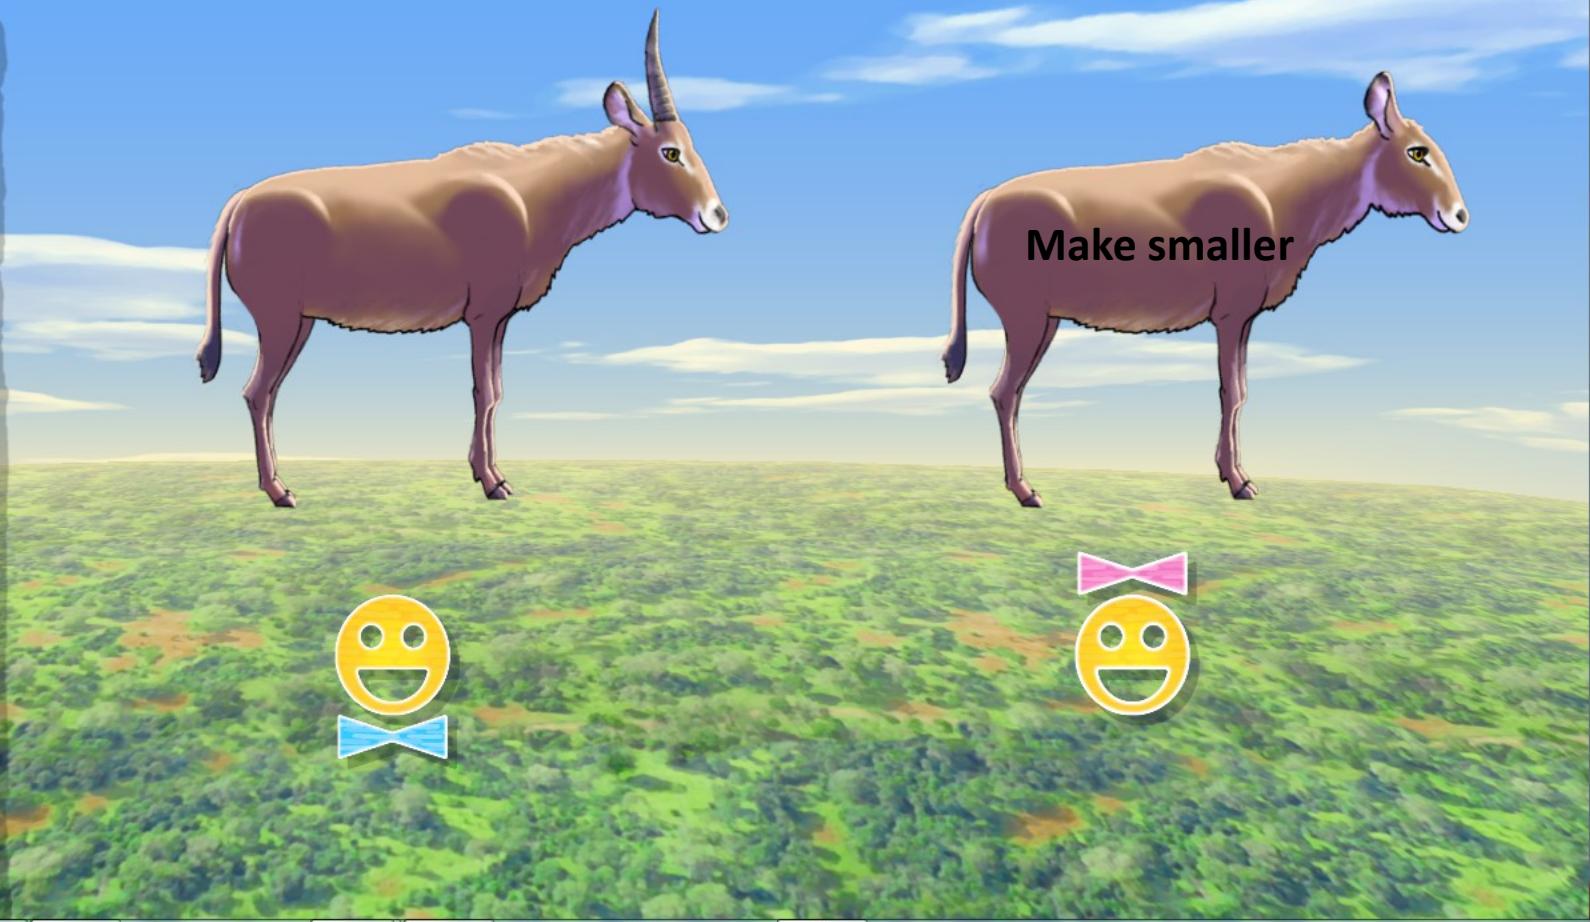

Least Concern
(LC)

Waterproofing the coats
with oil from glands leave
them a bit smelly.

Herbivore

Family: Bovidae
Genus: Kobus

Species: *K. ellipsiprymnus*

Need to lower the music when
the names are activated

Zebra Duiker

Vulnerable

(vU)

Duikers have large, complex
brain and can be considered
the smartest of the bovids.

Omnivore

Add pic Insect (ant),
frog/lizard, birds

Family: Bovidae

Genus: Cephalophus

Species: C. zebra

Their horns are short and round with sharp pointed tips.
They are about 4.5 - 5.0 cm long in males, and half that in
females. Female body size is larger than males, possibly
due to long gestation periods.
