antelope UP

Instruction Manual

Getting Started

 This button opens the Settings Menu. Here you can change sound volume.

 Press the Next Page Button inside of the Info Menu to browse the antelopes.

 The Go Back Button will allow you to return to the previous menu.

 This button opens the Info Menu. Here you can learn more about the antelopes.

 These icons show how many Tries you have left to finish matching all of the antelopes.

 A Try will be crossed out after an unsuccessful attempt is made to match an antelope.

Tutorial

"Hujambo! Hello! Welcome! I am David, a Masaai from Tanzania and I will act as your Tour Guide today! Tanzania is in Eastern Africa. Let us start here. First, open the Antelope UP app. Once you see the map of Africa, click on the outlined region furthest to the right."

Eastern Africa

"Now you should see some new buttons appear. One for Baby, Easy, Medium, and Hard difficulty modes. We will try Baby for now. Click on the Baby button and the matching game will begin!"

"There are two cards with antelopes hidden behind them. If you click either one, it will turn over. Find another antelope that looks just like this one. The other antelope is hiding behind the other card! Match all the antelopes to win!"

"That's all there is to it. Continue on your journey discovering more Antelope and be careful not to click on a lioness..."
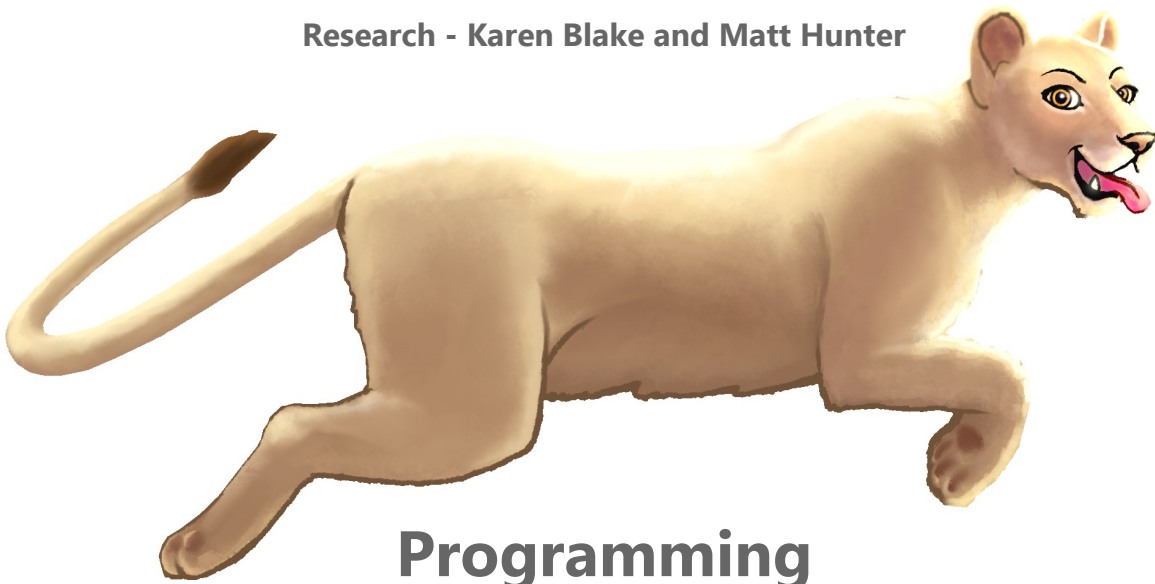

Credits

Design

Original Concept - Karen Blake

Designers - Kurt Loeffler, William Blake and Matt Hunter

Research - Karen Blake and Matt Hunter

Programming

Technical Director - Kurt Loeffler

Unity Programmer - Jeff Frank

Graphics

Art Director - William Blake
